

Solution Architecture

Date	04 July 2026
Team ID	XXXXXX
Project Name	Smart-Lender-Loan-Eligibility-Prediction
Maximum Marks	5 Marks

Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Provides the user interface for entering applicant details and displaying loan eligibility results.	HTML5, CSS3, JavaScript
Application Layer (Flask)	Receives user requests, validates inputs, and coordinates communication between the frontend and the machine learning model.	Python, Flask
Machine Learning Service	Preprocesses input data, loads the trained model, and predicts loan eligibility.	Scikit-learn, Joblib, Pandas, NumPy
Data Storage Layer	Storesthe trainingdataset,trained machine learning model,andpreprocessing scaler.	CSV Dataset, Pickle (.pkl) Files
